

## Powerproject BIM

Use the power of 4D planning for more rigorous scheduling

### Link tasks to 3D model components and use the visual power of 4D

- ◆ Identify problems that may not be visible via traditional schedules
- ◆ Run scenarios to assess feasibility of execution and find the best solutions
- ◆ Study how the build process will appear at different stages through the project
- ◆ View progress in 3D and visually compare planned versus actual
- ◆ Work seamlessly with plan and model in one application
- ◆ See the impact in the 3D view as you update the Gantt chart

### Quick to learn with easy navigation

- ◆ Easily create your project plan from your 3D model
- ◆ Fully integrated within familiar Powerproject interface
- ◆ 'Drag and drop' objects between model and Gantt chart
- ◆ View models externally and internally
- ◆ Split screen functionality for easy comparison

**“ It is so easy and straightforward to generate a 4D visualisation of the programme. ”**

*Tim Huxtable, Senior Project Planner,  
Laing O'Rourke Construction*

# Powerproject BIM

## Improve collaboration across teams

- ◆ Share views easily with free viewer
- ◆ Export animations to video and show a timeline view of the build sequence
- ◆ Save images to clearly show each build stage
- ◆ Keep everyone up-to-date with one clear view comparing planned versus actual

## Save time and increase efficiency

- ◆ Reduce risk of human error and speed up the linking process
- ◆ Update the plan and model easily as the project progresses
- ◆ Identify process improvements before getting on site

## Work the way you plan

Split 3D elements down into sub-sections to better reflect build sequence and allow separate scheduling.

## Link with costs for 5D BIM

Import costs from estimation software, such as our Bidcon application.

## How to access Powerproject BIM

Powerproject BIM is a fully integrated module of Powerproject. Existing users can add it to current licences and new users can purchase a combined licence for Powerproject and Powerproject BIM.

“ I really like how it allows you to demonstrate changes live in a meeting situation providing great benefit to the project team's visualisation of the construction sequence. ”

Jonathon Stanton,  
InCo Projects
